```c
#include <stdio.h>
#include <conio.h>
int main(void)
{
    //variable declarations
    int i, j;

    //code
    printf("\n\n");

    for (i = 1; i <= 20; i++)
    {
        for (j = 1; j <= 20; j++)
        {
            if (j > i)
            {
                break;
            }
            else
            {
                printf("* ");
            }
        }
        printf("\n");
    }
    printf("\n\n");
    return(0);
}
```
